HIGH QUALITY GLASS MARKER BOARDS

Innovator in the magnetic glass marker board development, Fulbright Glass Marker Boards are manufactured using the highest quality materials combined with superior craftsmanship.

We have built an excellent reputation in the contract furniture industry over 20 years with excellence in quality and service. Our strong suit has been tackling complex projects that require a high degree of craftsmanship and technical expertise. We have a history of working with some of the largest companies in the world, providing them with superior products.

Why Fulbright?

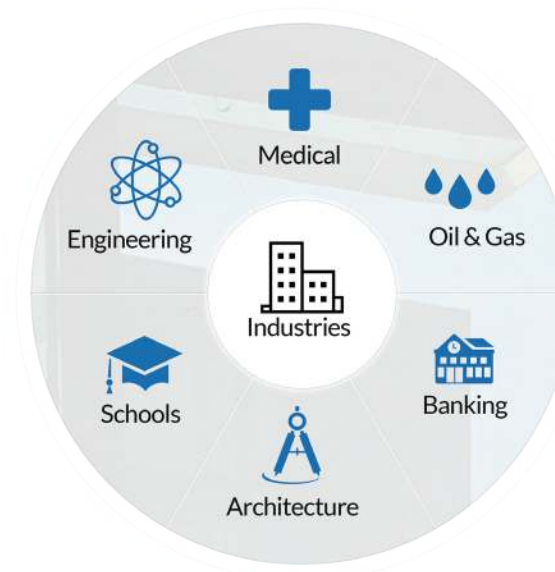

Fulbright Glass Boards is a division of a privately held company specializing in the manufacturing of finer quality architectural products. Focusing on the most highly visible areas of an office, our products compliment the boardrooms and offices of many high profile clients such as General Electric, Exxon/Mobile, Kinder Morgan, Country Music Hall of Fame, Pimco, Halliburton, The King Ranch, Qualcomm, Yale University, Rice University, Invesco, and Citi Group along with many more. With superior products, on time delivery, unparalleled customer service and the highest ethical standards Fulbright will exceed your expectations.

easy to read, clear
and won't stain over time

Engineered to improve visibility & provide long-lasting life.

Fulbright Glass Boards have been engineered to improve visibility and provide a long lasting life, free of staining or ghosting, even permanent marker can easily be removed.

Our glass boards are manufactured in the U.S.A. using 1/4" tempered safety glass to certify strength and safety. They are 4-5 times stronger than your typical piece of glass, making them virtually unbreakable.

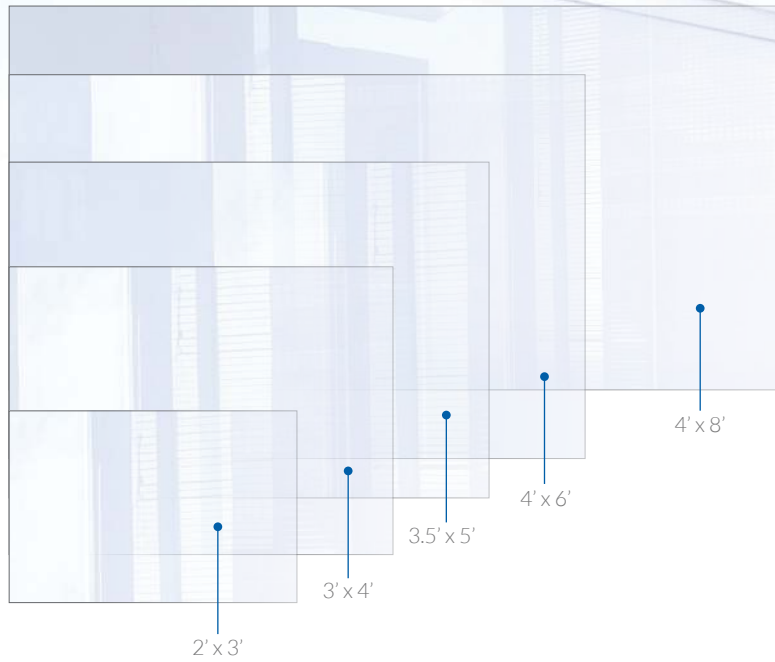

Innovating a Myriad of Industries

We offer a sleek and modern look to any conference room, office, classroom, hospital, or any other highly visible setting. Our glass visual displays are available in clear, frosted, white, as well as custom colors.

Having a difficult time deciding on what size best works for you? Have a custom architectural element but unsure how to complete your vision? Consult with one of our team members who will be able to help bring your requirements and design full circle.

Available in Different Sizes & Colors

Fulbright Glass Boards are available in the following standard sizes. Depending on your application custom sizes are available at no additional charge. To ensure the truest colors are expressed, low iron Starphire glass is used. Standard colors are available as well as custom color matching, your options are limitless.

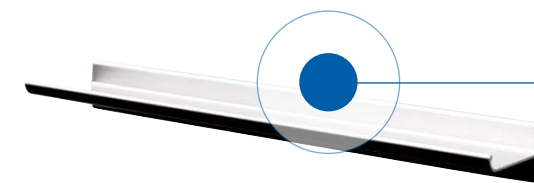

COLOR CHOICES AVAILABLE

MAGNETIC GLASS TECHNOLOGY

Looking for more than just your standard glass board?

Magnetic glass boards provide the user a superior and sleek template to brainstorm ideas upon. Users from all industries love to have the ability to lay out their new catalogs, reports, website designs, products, blue prints, and architectural designs utilizing magnetic glass boards.

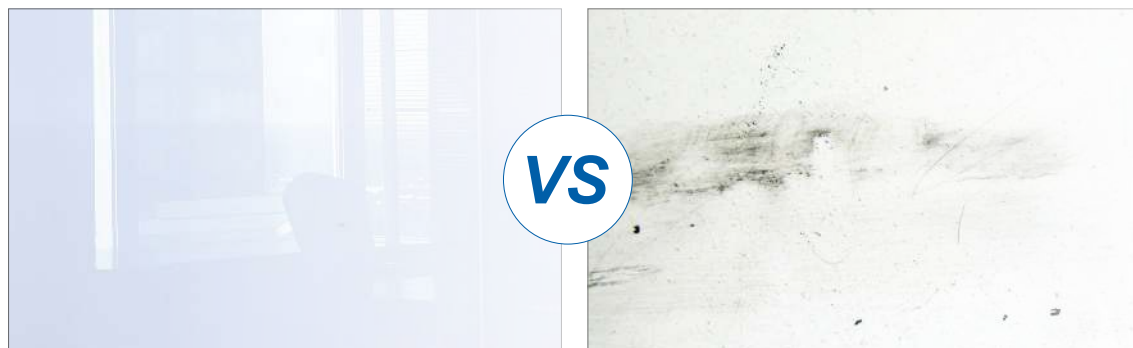

Magnetic Marker Rail

We have magnetized our marker rail to utilize the marker board's magnetic function.

- Anodized Aluminum Finish
- 12" in length
- Magnetized
- Easily removable from the board to provide a much cleaner appearance

Glass Marker Board vs. Standard Dry Erase Board

One of the most annoying aspects of any standard dry erase board is the staining and ghosting that is associated with it. We have all encountered a stained and ghosted dry erase board and attempted to erase yesterday's presentation. Even more annoying is when someone makes the ill-fated mistake of using a permanent marker and ruining the dry erase board forever. Fulbright glass boards can erase all of those headaches. You will never be able to stain your glass board. They are compatible with dry erase markers, wet erase markers, grease pens, and even permanent marker.
